R10

Set No. 1

IV B.Tech I Semester Supplementary Examinations, February/March - 2018
MATLAB
(Open Elective)

Time: 3 hours   **Max. Marks: 75**

Answer any FIVE Questions
All Questions carry equal marks
*****

1 a) List out and explain the advantages and disadvantages of MATLAB. [8]
   b) Explain about help and lookfor commands in MATLAB. [7]

2 a) Write a MATLAB Program to plot the following graphs
       i) $e^{-at}(\cos bt + \cos bt^2)$
       ii) $e^{-at}\sin bt$. A provision is to be given to take the values of a and b as inputs [8]
   b) Explain the procedure to create a function file. [7]

3 a) Explain various array and matrix operations in MATLAB. [8]
   b) What are different logical and relational operators in MATLAB? [7]

4 a) Discuss about if, if-else, nested if structures in MATLAB. [8]
   b) Write the MATLAB statements required to calculate and print out the squares of all the even integers between 0 and 50. Create a table consisting of each integer and its square, with appropriate labels over each column. [7]

5 a) Discuss about sub function, nested function, and private functions. [8]
   b) Write a function to calculate the cross product of two vectors A and B defined as, $A=ia_x+ja_y+ka_z$, $B=ib_x+jb_y+kb_z$. [7]

6 a) Explain the following
       (i) plot   (ii) stem   (iii) xlabel   (iv) ylabel
       (v) legend   (vi) title   (vii) plot3   (viii) figure [8]
   b) Suppose that George, Sam, Betty, Charlie, and Suzie contributed $15, $5, $10, $5, and $15, respectively, to a colleague's going-away present. Create a pie chart of their contributions. What percentage of the cost was paid by Sam? [7]

7 a) Explain how to change the object properties at the creation time and after creation time. [8]
   b) Explain the special functions to help find the handles of objects with an example. [7]

8 a) Enumerate and explain the procedure of creating and displaying a GUI. [8]
   b) Write a GUI program that plots the equation $y(x)=ax^2+bx+c$ [7]
