B.E. (Civil)
DAMS and Hydraulic Structures
(2015 Pattern) (Semester - II)

Time : 1 Hour]

[Max. Marks : 30

Instructions to the candidates:

Solve Q.1. or Q.2., Q.3. or Q.4., Q.5 or Q.6.

Q1) a) Define & Explain the meaning of storage dam, diversion dams, overflow dams. [5]

b) Write different types of Instruments used to monitor dam at least four and explain any one. [5]

OR

Q2) a) Explain the factors which govern the selection of site for dam construction. [5]

b) What are the objectives of dam safety and instrumentation. [5]

Q3) a) Write short note on:

Horizontal inertia force which force should be taken into consideration while designing the dam structure. [5]

b) What is meant by the best central angle of an arch dam & what is its value? [5]

OR

Q4) a) Write advantages of Buttress Dams. [5]

b) A 20m high concrete gravity dam has vertical upstream face and downstream face is inclined at 45° . The top and base widths are 2m and 20m. respectively. The free board is 2m. Take weight density of water as 10kN/m^3 & concrete 24kN/m^2 . Determine factor of safety against overturning. Consider full uplift. [5]

P.T.O.

- Q5)** a) Discuss the various types of energy dissipator used below spillway in relation to the position of tail water depth and jump height curve at least two with sketch. [5]
- b) State classification of spillway and purpose of its provision (4 types)[5]
- Q6)** a) State four types of spillway gates and explain any one with sketch. [5]
- b) Write design steps for Down stream crest of ogee spillway. [5]
