12. Mention uses of a dictionary.
13. Make three 'Wh' questions and two 'Yes/No' questions from the following passage:

Bangalore is the capital of Karnataka state. It has a pleasant climate. It is also known as Garden city. It is famous for silk industry. It is also important for the industries like manufacturing aeroplanes, wheel and axle plant of railways, telephone apparatus and electrical appliances. Hindustan Machine Tools factory manufactures HMT watches. Electronic industry is also well developed in Bangalore. Besides these, there are a large number of cottage industries of handloom, silk, ivory work, sandal wood, soap, oil and perfumes. Indian Space Research Organization was set up here. Bangalore has also several important educational centers like IIM, IIS etc.

14. Describe your street or colony in 150 words.
15. Read the following passage and make necessary corrections:

* Myself is Nagesh. My father name is Ramesh. I am living in Naidupeta for the last fifteen years. I have been suffering with fever since six days. One of my best friend has taken me to hospital three days ago. I am so weak to walk today. If I take medicine and fruits, I get energy. I go to polytechnic tomorrow.

16. Write a set of instructions to renew the bus pass.
17. Write a paragraph on internet.
18. Read the following passage and answer the questions that follow:

In a pond, we find that different organisms live in different regions. This is due to some conditions like availability of different amounts of food, air light, etc. we find organisms like dragonfly, mayfly and kingfisher living about the surface, that is hovering about the pond and then resting over a bamboo pole or a stick jutting out of the surface of the pond. They got food from the surface of the pond.

Organisms like snail, whirling beetle and pond skater live on the surface. The larva of mayfly and dragonfly also live on the surface of the pond. Plants like Pistia float on the surface completely while those like the lotus have roots going deep under. On the surface organisms are easily eaten up by others because there is little protection for them. However, there is plenty of food and air and that is why fish usually come to the surface to feed.

* Great water boatman. Leech and mosquito larva are found in midst of water. Fish and carps also swim around this region. Pond margins have several grasses, frogs, cranes, crabs, etc. fish usually lay eggs here. The bottom of the ponds has plants like Hydrilla and animals like mussels, flatworms and some maggots (larva of some insects). Lights is minimum here, but food, in the form of dead and decaying matter is in plenty.

Questions:

- a) Why do different organisms live in different regions?
- b) Where do we find organisms like dragonfly, mayfly and kindfisher?
- c) Why do fish usually come to the surface to feed?
- d) Where do fish usually lay eggs?
- e) Where do plants like Hydrilla grow?

*
