Replacing a bulb

(b) Write a paragraph using the hints given in the table.

The table below gives information on consumer spending on different items in five different countries in the year 2002.

Country	Food/drinks/tobacco	Clothing/footwear	Leisure/education
Ireland	28.91%	6.43%	2.21%
Italy	16.36%	9.00%	3.20%
Spain	18.80%	6.51%	1.98%
Sweden	15.77%	5.40%	3.22%
Turkey	32.14%	6.63%	4.35%

15. (a) Write a letter to your Principal about organizing a lecture on life skills in your college.

(b) Write a resume for a trainee engineer in Sriven Technologies, Hyderabad.

16. (a) Make notes on the for the following passage:

Computers have made our life much easier. They can complete tasks at lightning speed with precision and accuracy. They are used for both work and entertainments at office, in hospitals, in Government organizations and in business depending upon the situation. People can find any type of information on the internet. Educational and informative websites are available and one can download books and tutorials. Many institutes are providing distance learning programs. The student does not need to come to the institute. The institute provides the reading material and the student does not need to come to the institute. The institute provides the reading material and the student attends the virtual classroom. The trend of online examinations like GRE, GMAT and SAT are conducted online all over the world. With a computer one can manage office work at home. Reports can be submitted online. The owner of a company can check the work of the employees from home. Computers can be used to manage the home budget. People can easily calculate their expenses and income. They can use software that can manage income and expenses and generate reports. Another important use of computers at home is playing games. These games are a source of entertainment and recreation and can improve one's mental ability and thinking power. People can watch movies, listen to songs and watch videos. They can also watch live matches on the internet. They can interact with friends over social media websites like facebook and twitter. The use of computer technology in business provides many facilities. Businessmen are using computers to

interact with their customers anywhere in the world. Most stock exchanges today perform all trading activities electronically. Specialized hospital management software is used to automate the day to day procedures and operations at hospitals.

(b) Summarize the following;

Ladies, watch out. The next time you purchase cosmetics ensure that they are safe. Contrary to tall promises made by the industry, a number of cosmetics are health hazards and may turn you ugly instead of prettier. Studies have shown that cosmetics are toxic, containing chemicals and other ingredients which can cause cancer. Some brands of talcum powders are said to contain asbestos. Unfortunately, consumers, particularly women are carried away by the attractive advertisements. Very rarely do they read the contents of the cosmetics they use. Take, for instance, the shampoo used for cleaning hair. Hundreds of brands are available in market, each one promising something special and novel. It is a common belief that using soap to clean the hair is harmful. But a comparative research carried out by a doctor with the help of a consumer union in Japan has found that shampoo can damage your hair and result in hair loss. Research has revealed that the thickest hair among the shampoo users was only 0.097 mm, whereas soap users 0.1mm. Years ago, people used to dye their hair black. But nowadays, women dye their hair in different colours ignoring the harmful effects it has on their health. You can find women with dark brown and light violet coloured hair. Hair dyes which may be bleacher, temporary dyes, semi-permanent dyes, contain potentially hazardous chemicals like ammonia and hydrogen peroxide, p-phenylenediamine and toluene diamines. Hydrogen peroxide is said to ruin hair condition. According to a report in the UTUSAN KONSUMER, temporary dyes contain metallic substances, like lead, which are toxic and can be absorbed through the scalp into the body. These temporary dyes are derived from Benzodrine, known to produce bladder cancer. The report further states that semi-permanent dyes are made of chemicals called nitro dyes like coal tar and petroleum. Coal tar is an irritant and sensitizer. Studies in India have shown that an abnormally high incidence of cataract is among the users of coal tar. You will be alarmed to know that permanent hair dyes contain more than 30 chemicals, including hydrogen peroxide. Likewise, you have ever tried to look beyond the glow of nail polishes to its effect? Nail polish remover contains an ingredient called acetone which can cause your nail to become brittle and split. However, acetone is less toxic when compared toluene, another ingredient found in the nail polish. The basic ingredient used in nail polish is formaldehyde resin which

can discolour the nails. It is a colourless gas with a strong, irritating smell, used also as an anti-septic for killing germs. Formaldehyde is also known by other names like methanol and methaldehyde. It may be interesting to know that of all the cosmetics lipstick is the most toxic and dangerous for three reasons. Firstly, women who apply lipstick swallow the chemicals directly. Secondly, it gets absorbed through the tender lip skin.

17. (a) Write a report about the medical camp conducted in your college

(b) Write a letter to your friend about a movie you watched.

18. (a) Read the following passage and answer the questions that follow:

Two hundred years ago visiting a doctor was a risky business. Operations were performed without proper anesthetic, open wounds often became infected, and many deadly diseases could not be treated. Today, doctors can vaccinate, anesthetize, sterilize and treat with antibiotics. Dramatic discoveries and ingenious and life saving procedures have come into existence. In 1928 for example, Alexander Fleming discovered a mold that could fight germs. Twelve years later, Howard Florey and Ernst Chain developed this substance and invented the first antibiotic-penicillin. Many of the tools now used by doctors were invented in the 1800's: the stethoscope, which listens to heartbeats; the endoscope, which allows doctors to peer inside the body; and the sphygmomanometer, which measures blood pressure

- 1) Why was visiting a doctor risky two hundred years ago?
- 2) What can modern doctors do?
- 3) List the instruments used by doctors today.
- 4) What does the word 'peer' mean according to the passage?
- 5) What did Fleming discover?

(b) Read the following passage and answer the questions that follow:

"Can you imagine the airplanes of the future? Will passenger jumbo-jets be equipped with stores, restaurants, cabins and space for 1,000 passengers. How fast will be airplanes of tomorrow be able to travel? Supersonic planes such as Concorde are the fastest passenger planes today. They travel at Mach 2.1 and to exceed this airlines would need to fly at about 60,000 feet. But at this high altitude, jet engines can harm the ozone layer. Special purpose airplanes such as the Bell/Boeing Tiltrotor, which is part helicopter and part airplane will definitely be part of aviation's future:

- 1) What is fastest plane today?
- 2) At what speed do they fly?
- 3) How many passengers can a jumbo jet carry?
- 4) Why is the Bell/Boeing Tiltrotor special?
- 5) What is the advantage of jet engines?
